REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Note that, Applicant's amendments, Applicant's arguments, and the Examiner's Amendment are sufficient to place the instant claims in condition for allowance. Of the

references of record, the most pertinent is WO0/27271. '271 teaches cleaning compositions, pads, wipes, and implements which provide effective cleaning of hard surfaces. See Abstract. However, '271 does not teach or suggest a composition containing a specific combination of an organic acid, a polymer such as a copolymer of vinyl pyrrolidone and acrylic acid, an organic solvent, water, and the other requisite components of the composition in the specific amounts as recited by the instant claims.

None of the references of record, alone or in combination, teach or suggest a composition containing a specific combination of an organic acid, a polymer such as a copolymer of vinyl pyrrolidone and acrylic acid, an organic solvent, water, and the other requisite components of the composition in the specific amounts as recited by the instant claims. Accordingly, since the prior art of record fails to teach or suggest such a composition as recited by the instant claims, the instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
